

```
fmt::formatter< std  
::string >
```

A diagram illustrating a relationship between two C++ types. At the top, a white box with a thin gray border contains the text `fmt::formatter< std::string >`. Below it, a gray box with a thin black border contains the text `fmt::formatter< __int128_t >`. A blue arrow points vertically from the top of the gray box to the bottom of the white box, indicating that the gray box inherits from or is a specialization of the white box.

```
fmt::formatter< __int128_t >
```
